PROFESSIONAL SUMMARY

Full-Stack Developer with experience building scalable, high-performance web applications using TypeScript, React, Next.js, NestJS, and PostgreSQL. Strong background in backend API architecture, real-time systems, caching, authentication, and database optimization. Passionate about clean architecture, performance tuning, and building intuitive user experiences.

EXPERIENCE

Google Developer Group on Campus, Core Team Member

09/2024 – 07/2025 | University of Ilorin

- Organized and facilitated technical workshops and developer events.
- Collaborated with the technical team for large-scale campus events including CareerFest x Tech Summit and Build with AI.
- Contributed to community growth and developer onboarding initiatives.

Melcom eX, Backend Developer

06/2024 – 04/2025 | Remote

- Designed and developed scalable RESTful APIs using NestJS and PostgreSQL.
- Implemented authentication (JWT/OAuth) and caching strategies to improve system performance.
- Optimized database queries and reduced response time through indexing and query tuning.
- Contributed to CI/CD pipelines and Docker-based deployment workflows.

FIRST LEGO League Nigeria, Lead Programmer

10/2019 – 08/2022
Federal Science and Technical College, Orozo

- Led development of 5 autonomous LEGO Mindstorms robots for national robotics competition.
- Represented my school in the FIRST LEGO League Nigeria, developing and programming robots for real-world challenge simulations.
- Achieved Runner-Up position (2021 National Season).

PROJECTS

Banter 🔗, Real-time chat and video calling platform with modern UI and seamless connectivity features include live messaging, video conferencing and secure authentication. Built with Next.js, NestJS, PostgreSQL, Redis, and Socket.io

08/2025 – 10/2025

- Built AI-powered summarization system processing 10,000+ words per session.
- Reduced response time by 60% via server-side caching optimization.
- Integrated text-to-speech for audio generation.

Recapify 🔗, AI-powered text summarization and audio generation tool using Gemini API. Built with React, NestJS, Prisma, PostgreSQL, and Cloudinary.

04/2025 – 05/2025

- Built AI-powered summarization system processing 10,000+ words per session.
- Reduced response time by 60% via server-side caching optimization.
- Integrated text-to-speech for audio generation.

InnkeeperPro 🔗, Property management tool for hotels, handling reservations, guests, and reporting. Built with React, NestJS, PostgreSQL, and TailwindCSS.

02/2025 – 03/2025

- Designed scalable booking management architecture handling high concurrent reservations.
- Improved booking update speed by 90% using real-time architecture.
- Implemented secure JWT-based authentication.

StoryNest 🔗

12/2025 – 01/2025

- Built reservation and content management system with rich-text editing.
- Optimized media uploads for improved performance.
- Achieved 50+ active users with 68% average engagement rate.

TECHNICAL SKILLS

Languages — TypeScript JavaScript Golang Php, **Frontend** — React Next.js TailwindCSS, **Backend** — NestJS Express.js REST APIs, **Databases** — PostgreSQL MongoDB, **ORM & Tools** — Prisma Docker Redis Git GitHub Postman, **Authentication** — JWT OAuth, **Testing** — Jest, **Systems** — Linux, **Concepts** — RESTful Architecture WebSockets Caching

EDUCATION

Mohawk College, Computer System Technology - Software Development

2026 – Present | Hamilton, Ontario

University of Ilorin, B.Sc. Information Technology

2023 – 2025 | Ilorin, Kwara State
